1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2-23-07 has been entered. The amendment after final has been entered.

2. Claims 6 and 7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The intended differences in scope between claim 6 and independent claim 11 and between claim 7 and claim 12 are indefinite.

3. Claims 1-9, 11-15 and 32-37 are rejected under 35 U.S.C. 102(e) as being fully met by Mizutani et al.'869. Mizutani et al. (col. 2, lines 41-60 ; col. 4, lines 33-49; col. 28, lines 10-59) disclose antireflection layers comprising polymers and basic compounds including guanamine and benzimidazole adhesion promoters.

4. Claims 13-15 are rejected under 35 U.S.C. 102(e) as being fully met by Neisser et al. for the same reasons as set forth in paragraph 2 of the first office action filed 7-12-06. Claim 13 is not limited to particular bases.

5. Claims 13-15 are rejected under 35 U.S.C. 102(b) as being fully met by Pawlowski et al.'750 for the same reasons as set forth in paragraph 4 of the first office action.

6. Claims 1-9, 11-15 and 32-37 are rejected under the first paragraph of 35 USC 112 as being broader than the enabling disclosure for the same reasons as set forth in paragraph 4 of the final office action filed 11-20-06.

7. Claims 1-9, 11-15 and 32-37 are rejected under 35 U.S.C. 102(b) as being fully met by Hasegawa et al. or Sato et al. Hasegawa et al. (col. 26, line 56-col. 28, line 13) discloses coating compositions with polymers , photoacids that absorb imaging radiation and basic amine compounds including purines, adenines and guanine. The layers would inherently reduce reflection if used as an underlayer at least to some extent. The instant claims only materially require the presence of the basic compounds. Sato et al. (paragraphs 101-109) disclose coating compositions comprising polymers, photoacids, optional dyes and basic amine compounds including purines.

8. Claims 1-9, 11-15 and 32-37 are rejected under 35 U.S.C. 102(e) as being fully met by Nishimura et al. Nishimura et al. (col. 50, lines 1-40 ; examples 3,4,8,10,11) disclose coating compositions with polymers, photoacids and basic amine compounds including purines and benzimidazoles.

9. Iwasaki et al. and Yasunami et al. are cited of interest as disclosing coating compositions comprising basic amine compounds.
